GS Gaurav Soni
Senior Frontend Engineer

Experienced Front-end engineer with over 8 years of experience in information technology. Excellent reputation for resolving problems and improving customer satisfaction. Dedicated front-end technologies professional with a history of meeting company goals utilizing consistent and organized practices. Skilled in working under pressure and adapting to new situations and challenges to best enhance the organizational brand.

Experience

October 2019 - Current
Backbase | Utrecht
Senior Frontend Engineer

- Delivered configurable features for positive pay(fraud detection) mechanism with 100% code coverage that can be either directly used or extended via slots.
- Close collaboration with PO, UX, BEs, and FEs to achieve target results.
- Mentored one junior front-end developer on the team.
- Saved cost and time up to 20% by building a tool that automatically generate boilerplate code for customers.
- Lead migration of the existing application to NX monorepos.
- Built lint rule to validate package versions before publishing which results in increased efficiency by 40% across teams.
- Improved web app accessibility level from A to AA.
- Improved the Software Development Life Cycle (SDLC) by optimizing pipeline tests, resulting in up to a 50% reduction in execution time.
- Created documentation for our journey libraries to reduce implementation time by 30% for the customer success team.

December 2017 - September 2019
ValueLabs | Hyderabad
Frontend Engineer

- Delivered new features, fix bugs, and refactored different parts of the web apps that can manage acquisition deals in real estate businesses.
- Reviewed project specifications and design technology solutions that met 100% performance expectations.
- Worked with software development and testing team members to design and develop robust solutions to meet client requirements for functionality, scalability, and performance.

- Translated UX and business requirements into elegant code solutions.
- Applied design patterns to standardize and improve application code structure.
- Investigated and integrated new approaches for UI testing.
- Introduced a new way of handling responsive views of components.
- Analysed and optimized the code base to get rid of all code duplications to meet DRY.

August 2014 - December2017
Bebo Technologies | Chandigarh
Software Engineer

- Design and development of User Interface as a Single Page Application (SPA) for outsourcing portal.
- Implemented RESTful communication with the server side.
- Implemented code base coverage with unit and end-to-end (e2e) tests using Karma, Jasmine, and Protractor.
- Implementation of functional modules for legacy projects.
- Implementation of server-side functionality based on the following technologies: Python + Django.
- Translated UX and business requirements into elegant code solutions.
- Wrote 100% maintainable code with tests.

Additional Projects

Ng2-tel-input

- Open-source angular package that wraps the intl-tel-input library which is used to validate the phone number.
- Reached more than 45k downloads in the last 30 days.
Link:- https://www.npmjs.com/package/ng2-tel-input

Ngx-cc

- Open source angular package that provides a set of components that can determine credit card types(for example visa, master card, American Express, etc) and validate it by using the card-validator library(brain tree library)
Link:- https://www.npmjs.com/package/ngx-cc

Readily

Readily is the web app that will read and parse your CSV files exported from goodreads. After reading it will generate a nice-looking dashboard with a detailed summary of books.
